CAPABILITY STATEMENT

FRESH Technology Solutions (FTS): is an information technology company supporting the entire software development lifecycle to meet the needs of the federal government (specifically the IC). Design/develop COTS/GOTS Cloud solutions, to automate/modernize Agency systems, dataflows and business processes. We provided seasoned TS/SCI cleared resources in the following roles Software/System/Data/Test Engineers, as well as System/Database Administration roles. FTS is woman and minority owned and a rising hub-zone business, which gives us a distinct advantage in winning good work.

EXPERTISE

Software Development

- Solutions building
- Strategic planning
- Task management
- Roadmap development
- Change management
- Project/program management
- Agile development
- Analysis of Alternatives
- Systems architecture
- Full software dev lifecycle support
- GOTS/COTS software development
- Software Reseller & Integrator

Data Engineering & Data

Visualization

- Business process transformation
- Process automation
- Business Intelligence reporting
- Data management and governance
- Reporting and adv analytics
- Data architecture & standards
- Data architecture implementation

System Engineering

- Technical product development
- Technology and vendor assessments
- Systems implementations
- System analysis for performance increases and cost reduction
